Work Experience

BYU College of Life Sciences

April 2022 – Present

Team Lead, Web Developer – July 2025 - Present

- Led a team of 10 developers building, testing, and maintaining **production web applications** serving faculty and students across the college.
- Assigned tasks, review/approve code, and ensure project deadlines are met.
- Partnered with faculty to identify needs and deliver tailored web solutions.
- Reviewed and approved pull requests to maintain code quality and consistency.
- Set frontend standards using React, TypeScript, and component-based design.

Web Developer – March 2025 – July 2025

- Collaborated with a team of 10 developers to build and maintain websites across the college.
- Designed and implemented custom sites using **Next.js, React, and TypeScript** with a **.NET/C# backend**.
- Contributed to full-stack development, from front-end interfaces to server-side logic.

IT Help Desk Technician – April 2022 – March 2025

- Supported 1,000+ computers for faculty, staff, and students.
- Trained users on Brightspot CMS and provided technical support.
